### **Report on Internal Control Over Financial Reporting**

The Bank's principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Bank's Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Bank's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel. This process provides reasonable assurance regarding the reliability of financial reporting information and the preparation of the Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Bank, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Bank, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Bank's assets that could have a material effect on its Financial Statements.

The Bank's management has completed an assessment of the effectiveness of internal control over financial reporting as of June 30, 2017. In making the assessment, management used the framework in *Internal Control*—*Integrated Framework (2013)*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Bank's management concluded that as of June 30, 2017, the internal control over financial reporting was effective based upon the COSO criteria. Additionally, based on this assessment, the Bank's management determined that there were no material weaknesses in the internal control over financial reporting as of June 30, 2017.

Leon T. Amerson

Chief Executive Officer & President

Chief Financial Officer

August 8, 2017

## Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion reviews the financial condition and results of operations of AgFirst Farm Credit Bank (AgFirst or Bank) as of and for the three and six month periods ended June 30, 2017. These comments should be read in conjunction with the accompanying financial statements, the Notes to the Financial Statements, and the 2016 Annual Report of AgFirst Farm Credit Bank. AgFirst and its related associations (Associations or District Associations) are collectively referred to as the District. The accompanying financial statements were prepared under the oversight of the Audit Committee of the AgFirst Board of Directors.

Key ratios and data reported below, and in the accompanying financial statements, address the financial performance of AgFirst. However, neither the three months nor the six months results of operations may be indicative of an entire year due to the seasonal nature of a portion of AgFirst's business.

#### FORWARD-LOOKING INFORMATION

This quarterly report contains forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties, and assumptions that are difficult to predict. Words such as "anticipates," "believes," "could," "estimates," "may," "should," "will," or other variations of these terms are intended to identify the forward-looking statements. These statements are based on assumptions and analyses made in light of experience and other historical trends, current conditions, and expected future developments. However, actual results and developments may differ materially from AgFirst's expectations and predictions due to a number of risks and uncertainties, many of which are beyond AgFirst's control. These risks and uncertainties include, but are not limited to:

- political (including trade and tax policies), legal, regulatory, financial markets, and economic conditions and developments in the United States and abroad;
- economic fluctuations in the agricultural, rural infrastructure, international, and farm-related business sectors, as well as in the general economy;
- weather-related, disease, and other adverse climatic or biological conditions that periodically occur that impact agricultural productivity and income of District borrowers;
- changes in United States government support of the agricultural industry and the Farm Credit System (System) as a government-sponsored enterprise (GSE), as well as investor and rating agency reactions to events involving the U.S. government, other GSEs and other financial institutions;
- actions taken by the Federal Reserve System in implementing monetary and fiscal policy, as well as other
  policies and actions of the federal government that impact the financial services industry and the debt
  markets;
- credit, interest rate and liquidity risk inherent in lending activities; and
- changes in the Bank's assumptions for determining the allowance for loan losses, other-than-temporary impairment and fair value measurements.

#### FINANCIAL CONDITION

#### Loan Portfolio

AgFirst's loan portfolio consists of direct loans to District Associations (Direct Notes), loan participations/syndications purchased (Capital Markets), Correspondent Lending loans (primarily first lien rural residential mortgages), and loans to Other Financing Institutions (OFIs) as shown below:

Loan Portfolio						
(dollars in thousands)	June 30, 2	2017	December 3	31, 2016	June 30, 2	2016
Direct Notes*	\$ 15,519,675	67.99%	\$ 15,480,715	67.56%	\$ 15,074,069	66.89%
Capital Markets*	4,192,134	18.36	4,442,524	19.39	4,559,757	20.24
Correspondent Lending	2,976,848	13.04	2,868,870	12.52	2,769,849	12.29
Loans to OFIs	138,221	0.61	122,573	0.53	130,632	0.58
Total	\$ 22,826,878	100.00%	\$ 22,914,682	100.00%	\$ 22,534,307	100.00%

<sup>\*</sup>Net of participations sold.

Total loans outstanding were \$22.827 billion at June 30, 2017, a decrease of \$87.8 million, or 0.38 percent, compared to total loans outstanding at December 31, 2016 and an increase of \$292.6 million, or 1.30 percent, since June 30, 2016. Excluding Bank patronage payments to Associations of approximately \$239.2 million which were applied to the Association Direct Notes at the beginning of 2017 and a participation interest of approximately \$290.5 million in a Direct Note sold in February 2017 to another System bank, loan volume at June 30, 2017 increased 1.93 percent compared to 2016 year-end. The minimal increase in loan volume at June 30, 2017 resulted from improved demand from the forestry segment and from borrowers dependent on non-farm income. Also, loan demand over the previous twelve months benefitted from capital expansion in the poultry and swine sectors. Minimal growth is expected overall in 2017 due to weak demand resulting from reduced capital expansion in the agricultural sector.

#### Credit Quality

Credit quality of AgFirst's loans is shown below:

Total I con	Portfolio Credit	· Onality of of
I OTAL LOAD	FOLLIONO CIEUN	L COMAINEV AS OF.

Classification	June 30, 2017	December 31, 2016	June 30, 2016
Acceptable	99.06%	98.89%	98.67%
OAEM *	0.46%	0.67%	0.82%
Adverse **	0.48%	0.44%	0.51%

<sup>\*</sup>Other Assets Especially Mentioned

Loan portfolio credit quality at June 30, 2017 improved slightly compared to December 31, 2016 and June 30, 2016. Improved housing starts continue to provide stability in certain housing-related segments such as forestry and nursery/greenhouse. District real estate values are stable. Credit quality is expected to slightly deteriorate overall in 2017 given the effect of low prices to borrowers in certain commodity segments.

The credit conditions discussed above directly affect the credit quality of the Bank's participation/syndication loan portfolio. They also affect the credit quality of loan portfolios and earnings performance of the individual District Associations, which impacts the quality of the Bank's Direct Notes.

#### **Direct Notes**

AgFirst's primary business is to provide funding, operational support, and technology services to District Associations. Each Association, in addition to the Bank, is a federally chartered instrumentality of the United States and is regulated by the Farm Credit Administration (FCA). AgFirst provides a revolving line of credit, referred to as a Direct Note, to each of the District Associations. Each of the Associations funds its earning assets primarily by borrowing under its Direct Note. Lending terms are specified in a separate General Financing Agreement (GFA)

<sup>\*\*</sup>Adverse loans include substandard, doubtful, and loss loans.

between AgFirst and each Association. Each GFA contains minimum borrowing base margin, capital, and earnings requirements that must be maintained by the Association.

At June 30, 2017, the total Direct Note volume outstanding was \$15.520 billion, an increase of \$39.0 million, or 2.52 percent, compared to December 31, 2016. Excluding Bank patronage payments of approximately \$239.2 million and the sale of a participation interest of approximately \$290.5 million referenced in the Loan Portfolio section above, Direct Note volume increased 3.67 percent when compared to 2016 year-end. See the Loan Portfolio section above for the primary reasons for the change in the Direct Note volume from December 2016 to June 2017.

All Associations were classified as acceptable for all periods presented. Presently, collection of the full Direct Note amount due is expected from all Associations in accordance with the contractual terms of the debt arrangements, and no allowance has been recorded for Direct Notes. All assets of the various Associations are pledged as collateral for their respective Direct Notes. In the opinion of management, all Association Direct Notes are adequately collateralized. The risk funds of an Association, including both capital and the allowance for loan losses, also protect the interest of the Bank should a Direct Note default.

At June 30, 2017, all District Associations were operating under normal FCA supervision and in compliance with GFA covenants.

#### Capital Markets

The Capital Markets portfolio consists primarily of loan participations and syndications. As of June 30, 2017, this portfolio totaled \$4.192 billion, a decrease of \$250.4 million, or 5.64 percent, from December 31, 2016. The decrease is primarily due to fewer capital markets transactions coming to market combined with several large unexpected payoffs.

AgFirst employs a number of management techniques to limit credit risk, including underwriting standards, limits on the amounts of loans purchased from a single originator, and maximum hold positions to a single borrower and commodity. Although the participations/syndications portfolio is comprised of a small number of relatively large loans, it is diversified both geographically and on a commodity basis. Management makes adjustments to credit policy and underwriting standards when appropriate as a part of the ongoing risk management process.

Credit quality statistics for the participations/syndications portfolio are shown in the following chart:

	Participation	ons/Syndications Credit Qu	iality as of:
Classification	June 30, 2017	December 31, 2016	June 30, 2016
Acceptable	95.04%	94.34%	93.49%
OAEM*	2.50%	3.46%	4.06%
Adverse**	2.46%	2.20%	2.45%

<sup>\*</sup>Other Assets Especially Mentioned

Favorable credit quality in the participations/syndications portfolio has been sustained by continued improvement in general economic conditions.

#### **Correspondent Lending**

The Correspondent Lending portfolio consists primarily of first lien residential mortgages. As of June 30, 2017, the Correspondent Lending portfolio totaled \$2.977 billion. From December 31, 2016 to June 30, 2017, this portfolio increased \$108.0 million, or 3.76 percent.

Substantially all loans originated on or before July 31, 2013 in the Correspondent Lending portfolio have guarantees from the Federal National Mortgage Association (Fannie Mae) and/or the Federal Agricultural Mortgage Corporation (Farmer Mac), thereby limiting credit risk to AgFirst. The guarantees are in the form of Long-Term Standby Commitments to Purchase which give AgFirst the right to deliver delinquent loans to the guarantor at par. The Fannie Mae guarantee program in which AgFirst participated ended on July 31, 2013. Subsequent to this date, new

<sup>\*\*</sup>Adverse loans include substandard, doubtful, and loss loans.

loans in this portfolio purchased by the Bank are held without a Fannie Mae guarantee. As of June 30, 2017, \$1.521 billion, or 51.08 percent, of loans in the Correspondent Lending portfolio were guaranteed and \$1.456 billion, or 48.92 percent, were unguaranteed. The discontinuation of the Fannie Mae guarantee program is reflected in the Bank's allowance for loan losses methodology related to this portfolio.

At June 30, 2017, 99.80 percent of the Correspondent Lending portfolio was classified as acceptable and 0.20 percent was classified as substandard.

Rural home loans, combined with Rural Home Mortgage-backed Securities, are limited to 15 percent of the three-month average daily balance of total loans outstanding. Based on June 30, 2017 levels, the Bank has unused capacity of \$100.0 million under a total limit of \$3.472 billion. The Bank monitors this position and will consider options, should they become necessary, to manage the rural home asset level within the regulatory limit. See Note 3, *Investments*, in the Notes to the Financial Statements for further discussion of Rural Home Mortgage-backed Securities.

#### Nonaccrual Loans

Nonaccrual loans represent all loans for which there is a reasonable doubt as to the collection of principal and/or interest under the contractual terms of the loan. Nonaccrual loans for the Bank totaled \$19.7 million at June 30, 2017, a decrease of 31.97 percent compared to \$29.0 million at December 31, 2016. The decrease of \$9.3 million resulted primarily from \$9.7 million of repayments and \$3.4 million of Correspondent Lending loans sold to guarantors (see *Correspondent Lending* section above), partially offset by \$5.7 million of loan balances transferred to nonaccrual status. At June 30, 2017, total nonaccrual loans were primarily classified in the rural home loan (46.85 percent of the total), forestry (31.61 percent), and field crops (13.68 percent) segments. Nonaccrual loans were 0.09 percent of total loans outstanding at June 30, 2017 and 0.13 percent at December 31, 2016.

#### **Troubled Debt Restructurings**

A troubled debt restructuring (TDR) occurs when a borrower is experiencing financial difficulties and a concession is granted to the borrower that the Bank would not otherwise consider. Concessions are granted to borrowers based on either an assessment of the borrower's ability to return to financial viability or a court order. The concessions can be in the form of a modification of terms, rates, or amounts owed. Acceptance of other assets and/or equity as payment may also be considered a concession. The type of alternative financing granted is chosen in order to minimize the loss incurred by the Bank. TDRs decreased \$491 thousand since December 31, 2016 and totaled \$24.3 million at June 30, 2017. TDRs at June 30, 2017 were comprised of \$16.0 million of accruing restructured loans and \$8.3 million of nonaccrual restructured loans. Restructured loans were primarily in the nursery/greenhouse (35.80 percent of the total), forestry (25.65 percent), and swine (11.39 percent) segments.

#### Other Property Owned

Other property owned (OPO) consists primarily of assets once pledged as loan collateral that were acquired through foreclosure or deeded to the Bank (or a lender group) in satisfaction of secured loans. OPO may be comprised of real estate, equipment, and equity interests in companies or partnerships. OPO decreased \$802 thousand since December 31, 2016 and totaled \$2.5 million at June 30, 2017. The decrease was mainly due to the disposal of one property totaling \$633 thousand. The remaining OPO balance at June 30, 2017 consisted primarily of a real estate holding of \$2.4 million (94.08 percent of the total).

#### Allowance for Loan Losses

The Bank maintains an allowance for loan losses at a level management considers adequate to provide for probable and estimable credit losses within the loan portfolio as of each reported balance sheet date. The allowance for loan losses was \$15.4 million at June 30, 2017, as compared with \$14.8 million at December 31, 2016. The allowance at June 30, 2017 included specific reserves of \$237 thousand (1.54 percent of the total) and general reserves of \$15.2 million (98.46 percent). The increase of \$612 thousand from December 31, 2016 to June 30, 2017 resulted from provision expense of \$525 thousand and recoveries of \$171 thousand, partially offset by chargeoffs of \$84 thousand. See *Provision for Loan Losses* section below for additional details regarding loan loss provision expense and

reversals. The general reserves at June 30, 2017 included \$3.0 million of allowance provided by the Bank for loans in the Correspondent Lending portfolio purchased after July 31, 2013 which are being held without a Fannie Mae guarantee. See further discussion in the *Correspondent Lending* section above. None of the allowance relates to the Direct Note portfolio. See further discussion in the *Direct Notes* section above. The total allowance at June 30, 2017 was comprised primarily of reserves for the rural home loan (19.73 percent of the total), utilities (16.32 percent), forestry (10.35 percent), field crops (10.31 percent), processing (8.53 percent), and cattle (5.63 percent) segments. The allowance for loan losses was 0.07 percent and 0.06 percent of total loans outstanding at June 30, 2017 and December 31, 2016, respectively. See Note 2, *Loans and Allowance for Loan Losses*, in the Notes to the Financial Statements for further information.

#### Liquidity and Funding Sources

One of AgFirst's primary responsibilities is to maintain sufficient liquidity to fund the lending operations of the District Associations, in addition to its own needs. Along with normal cash flows associated with lending operations, AgFirst has two primary sources of liquidity: the capacity to issue Systemwide Debt Securities through the Federal Farm Credit Banks Funding Corporation; and cash and investments. The Bank also maintains several securities repurchase agreement facilities. In addition, the System has established lines of credit in the event contingency funding is needed to meet obligations of System banks.

The U.S. government does not guarantee, directly or indirectly, Systemwide Debt Securities. However, the Farm Credit System, as a GSE, has benefited from broad access to the domestic and global capital markets. This access has provided the System with a dependable source of competitively priced debt which is critical for supporting the System's mission of providing credit to agriculture and rural America. There is an implied link between the credit rating of the U.S. government and the System given the System's status as a GSE. Any significant concerns regarding the U.S. government could pose a risk to the credit rating of the System.

AgFirst's primary source of liquidity comes from its ability to issue Systemwide Debt Securities, which are the general unsecured joint and several obligations of the System banks. AgFirst continually raises funds in the debt markets to support its mission, to repay maturing Systemwide Debt Securities, and to meet other obligations.

The System does not have a guaranteed line of credit from the U.S. Treasury or the Federal Reserve. However, the Farm Credit System Insurance Corporation (FCSIC) has an agreement with the Federal Financing Bank (FFB), a federal instrumentality subject to the supervision and direction of the U.S. Treasury, pursuant to which the FFB could advance funds to the FCSIC. Under its existing statutory authority, the FCSIC may use these funds to provide assistance to the System banks in exigent market circumstances which threaten the banks' ability to pay maturing debt obligations. The agreement provides for advances of up to \$10 billion and terminates on September 30, 2017, unless otherwise renewed. The decision whether to seek funds from the FFB is at the discretion of the FCSIC. Each funding obligation of the FFB is subject to various terms and conditions and, as a result, there can be no assurance that funding would be available if needed by AgFirst or the System.

Currently, Moody's Investor Service and Fitch Ratings have assigned long-term debt ratings for the System of Aaa and AAA and short-term debt ratings of P-1 and F1, respectively. These are the highest ratings available from these rating agencies. Standard & Poor's Ratings Services (S&P) maintains the long-term sovereign credit rating of the U.S. government at AA+, which directly corresponds to its AA+ long-term debt rating of the System. These rating agencies base their ratings on many quantitative and qualitative factors, including the System's status as a GSE. Negative changes to the System's credit ratings could reduce earnings by increasing debt funding costs and could also have a material adverse effect on liquidity, the ability to conduct normal business operations, and the Bank's overall financial condition and results of operations. However, AgFirst anticipates continued access to funding necessary to support the District's and Bank's needs.

Ratings and outlook for AgFirst by Fitch Ratings are AA-/F1+ and stable. Ratings and outlook for AgFirst by S&P are AA-/A-1+ and stable.

At June 30, 2017, AgFirst had \$28.927 billion in total debt outstanding compared to \$29.408 billion at December 31, 2016. Debt decreased primarily due to lower balances of cash, investments, and loans as discussed elsewhere in this report.

Cash and cash equivalents, which decreased \$449.4 million from December 31, 2016 to a total of \$362.3 million at June 30, 2017, consist primarily of cash on deposit and money market securities that are short-term in nature (from overnight maturities to maturities that range up to 90 days). Incremental movements in cash balances between reporting periods are due primarily to changes in liquidity needs in relation to upcoming debt maturities.

Investment securities totaled \$7.981 billion, or 25.37 percent of total assets at June 30, 2017, compared to \$8.032 billion, or 25.06 percent, as of December 31, 2016. Investment securities decreased \$50.7 million, or 0.63 percent, compared to December 31, 2016. Management maintains the available-for-sale liquidity investment portfolio size generally proportionate with that of the loan portfolio and within regulatory and policy guidelines which provide that a System bank may hold certain eligible available-for-sale investments in an amount not to exceed 35.00 percent of its total loans outstanding. Based upon FCA guidelines, at June 30, 2017, the Bank's eligible available-for-sale investments were 33.20 percent of the total loans outstanding.

Investment securities classified as being available-for-sale totaled \$7.488 billion at June 30, 2017. Available-for-sale investments at June 30, 2017 included \$341.4 million in U.S. Treasury securities, \$4.391 billion in U.S. government guaranteed securities, \$2.142 billion in U.S. government agency guaranteed securities, and \$613.7 million in non-agency asset-backed securities. Since the majority of the portfolio is invested in U.S. government guaranteed and agency securities, the portfolio is highly liquid and potential credit loss exposure is limited.

As of June 30, 2017, AgFirst exceeded all applicable regulatory liquidity requirements. FCA regulations require that the Bank have a liquidity policy that establishes a minimum total "coverage" level of 90 days and that short-term liquidity requirements must be met by certain high quality investments or cash. "Coverage" is defined as the number of days that maturing debt could be funded with eligible cash, cash equivalents, and available-for-sale investments maintained by the Bank.

The FCA classifies eligible liquidity investments according to four liquidity quality levels with level 1 being the highest. The first 15 days of minimum liquidity coverage are met using only level 1 instruments, which include cash and cash equivalents. Days 16 through 30 of minimum liquidity coverage are met using level 1 and level 2 instruments. Level 2 consists primarily of U.S. government guaranteed securities. Days 31 through 90 are met using level 1, level 2, and level 3 securities. Level 3 consists primarily of U.S. government agency investments. The fourth level is a supplemental liquidity buffer in excess of the 90-day minimum liquidity reserve which is set to provide coverage to at least 120 days.

At both June 30, 2017 and December 31, 2016, AgFirst met each of the individual level criteria above and had a total of 201 days of maturing debt coverage. Cash provided by the Bank's operating activities is an additional source of liquidity for the Bank that is not reflected in the coverage calculation.

See Note 3, *Investments*, and Note 4, *Debt*, in the Notes to the Financial Statements and the *Noninterest Income* section below for further information.

#### Capital Resources

Total shareholders' equity increased \$165.6 million, or 7.44 percent, from December 31, 2016 to \$2.391 billion at June 30, 2017. This increase is primarily attributed to 2017 unallocated retained earnings from net income of \$163.9 million.

#### Regulatory Capital Ratios

AgFirst's regulatory ratios are shown in the following table:

	Regulatory Minimum,				
	Including Buffer	6/30/17	12/31/16	6/30/16	
Permanent Capital Ratio	7.00%	20.67%	21.31%	20.32%	•
Common Equity Tier 1 (CET1) Capital Ratio	5.125%	20.20%	*	*	
Tier 1 Capital Ratio	6.625%	20.65%	*	*	
Total Capital Ratio	8.625%	20.79%	*	*	
Tier 1 Leverage Ratio	5.00%	7.35%	*	*	
Unallocated Retained Earnings (URE) and URE Equivalent Ratio	1.50%	6.38%	*	*	
Total Surplus Ratio	7.00%	*	21.21%	20.23%	
Core Surplus Ratio	3.50%	*	19.13%	18.07%	
Net Collateral Ratio	103.00%	*	106.69%	107.00%	

<sup>\*</sup>Not applicable due to changes in regulatory capital ratio requirements effective January 1, 2017

The FCA sets minimum regulatory capital adequacy requirements for System banks and associations. Effective January 1, 2017, these requirements were modified to make System regulatory requirements more transparent and to ensure that the System's capital requirements are comparable with the Basel III framework and the standardized approach of federal banking regulatory agencies. The new requirements are based on regulatory ratios as defined by the FCA and include common equity tier 1 (CET1), tier 1, and total capital ratios which replace the total surplus and core surplus ratios. The net collateral ratio is also replaced by the tier 1 leverage ratio and the unallocated retained earnings (URE) and URE equivalents ratio under the new regulations. The permanent capital ratio remains in effect with minor modifications discussed below.

The permanent capital, CET1, tier 1, and total capital ratios are calculated by dividing the three-month average daily balance of the numerator, as defined by the FCA, by a risk-adjusted asset base as were the total surplus and core surplus ratios prior to 2017. Unlike these ratios, the tier 1 leverage, URE and URE equivalents, and collateral ratios do not incorporate any risk-adjusted weighting of assets. Risk-adjusted assets refer to the total dollar amount of the institution's assets adjusted by an appropriate credit conversion factor as defined by regulation. Generally, higher credit conversion factors are applied to assets with more inherent risk. The tier 1 leverage and URE and URE equivalents ratios are calculated by dividing the three-month average daily balance of the numerator, as defined by the FCA, by the three-month average daily balance of total assets adjusted for regulatory deductions. The collateral ratio was calculated by dividing the Bank's period-end collateral, as defined by FCA regulations, by period-end total liabilities.

For all periods presented, AgFirst exceeded minimum regulatory standards for all of the ratios. Changes in the risk weightings of certain assets under the new regulations resulted in a slight decline in the permanent capital ratio.

See *Regulatory Matters* section below for further discussion of capital ratios and related regulatory requirements effective in 2017.

#### **RESULTS OF OPERATIONS**

Net income for the three months ended June 30, 2017 was \$81.0 million compared to \$72.3 million for the three months ended June 30, 2016, an increase of \$8.6 million, or 11.95 percent. Net income for the six months ended June 30, 2017 was \$163.9 million compared to \$144.0 million for the six months ended June 30, 2016, an increase of \$19.9 million, or 13.85 percent. See below for further discussion of the change in net income by major components.

#### **Key Results of Operations Comparisons**

	Annualized for the		Annualized for the
	six months ended June 30, 2017	For the year ended December 31, 2016	six months ended June 30, 2016
Return on average assets	1.06%	1.08%	0.94%
Return on average shareholders' equity	14.26%	14.45%	12.44%
Net interest margin	1.46%	1.53%	1.49%
Operating expense as a percentage of net interest income and			
noninterest income	28.44%	28.56%	30.79%
Net (charge-offs) recoveries to average loans	0.00%	0.02%	0.00%

The annualized return on average assets and return on average shareholders' equity ratios improved for the first six months of 2017 compared to the same period in 2016 due to an increase in net income. Compared to the year ended December 31, 2016, slightly lower annualized net income for the first six months of 2017 resulted in lower return on average assets and return on average shareholders' equity ratios. The net interest margin ratio was negatively impacted for the 2017 period by an increase in interest-earning assets and higher debt costs. Compared to the year ended December 31, 2016, lower annualized net interest income in 2017 also contributed to the decline in the ratio. For the operating expense as a percentage of net interest income and noninterest income ratio, operating expense consists primarily of noninterest expenses excluding losses (gains) from other property owned. Compared to the year ended December 31, 2016, this ratio was positively impacted by a decline in operating expenses. Higher income for the 2017 period also contributed to the improvement in the ratio for the first six months of 2017 compared to the same period in 2016. Net recoveries positively impacted the net (charge-offs) recoveries to average loans ratio for all periods presented. See *Allowance for Loan Losses*, *Net Interest Income*, *Noninterest Income*, and *Noninterest Expenses* sections for further discussion.

#### Net Interest Income

Net interest income for the three months ended June 30, 2017 was \$112.2 million compared to \$112.3 million for the same period of 2016, a decrease of \$81 thousand or 0.07 percent. For the six months ended June 30, 2017, net interest income was \$222.9 million compared to \$220.9 million for the same period of 2016, an increase of \$2.0 million, or 0.89 percent. The net interest margin, which is net interest income as a percentage of average earning assets, was 1.46 percent for both the three and six month periods in 2017, a decrease of three basis points from 1.49 percent for both the three and six month periods of 2016. For the three month period, the decrease in net interest income resulted from higher rates paid on interest-bearing liabilities which more than offset the positive impact of higher yields and higher average balances for interest-earning assets. For the six month period, the increase in net interest income resulted primarily from higher average volumes and yields on interest-earning assets substantially offset by higher rates paid on interest-bearing liabilities.

During the six months ended June 30, 2017 and 2016, the Bank called debt totaling \$1.625 billion and \$9.107 billion, respectively, and was able to lower the cost of funds. Over time, as interest rates change and as assets prepay or reprice, the positive impact on the net interest margin that the Bank has experienced over the last several years from calling debt will continue to diminish.

The effects of changes in volume and interest rates on net interest income for the three and six months ended June 30, 2017, as compared with the corresponding periods in 2016, are presented in the following table. The table distinguishes between the changes in interest income and interest expense related to average outstanding balances and to the levels of average interest rates. Accordingly, the benefit derived from funding earning assets with interest-free funds (principally capital) is reflected solely as a volume increase.

			hree montl 017 vs. Jun			For the six months ended June 30, 2017 vs. June 30, 2016					
	Increase (	deci	rease) due t	to ch	anges in:	In	crease (d	ecre	ase) due to	cha	nges in:
(dollars in thousands)	Volume		Rate		Total	V	olume		Rate		Total
Interest Income: Loans Investments & Cash Equivalents	\$ 2,771 719	\$	10,007 5,589	\$	12,778 6,308	\$	7,974 2,195	\$	14,261 7,133	\$	22,235 9,328
Total Interest Income Interest Expense:	3,490		15,596		19,086		10,169		21,394		31,563
Interest-Bearing Liabilities	(211)		19,378		19,167		2,668		26,924		29,592
Changes in Net Interest Income	\$ 3,701	\$	(3,782)	\$	(81)	\$	7,501	\$	(5,530)	\$	1,971

#### Provision for Loan Losses

AgFirst measures risks inherent in its loan portfolio on an ongoing basis and, as necessary, recognizes provision for loan loss expense so that appropriate reserves for loan losses are maintained. Loan loss provision was a net reversal of \$84 thousand and a net expense of \$525 thousand for the three and six months ended June 30, 2017, respectively, compared to a net expense of \$1.1 million and \$2.0 million for the corresponding periods in 2016. A slight improvement in credit quality as well as lower balances in the capital markets portfolio contributed to the lower provision expense for the 2017 periods. For the three months ended June 30, 2017, the provision for loan losses included net provision reversals of \$115 thousand for specific reserves and net provision expense of \$31 thousand for general reserves. The largest segments included in the total provision reversal for the three month period in 2017 were tree fruits and nuts (\$212 thousand reversal) and field crops (\$404 thousand expense). For the six month period in 2017, the provision for loan losses included reversals of \$171 thousand for specific reserves and provision expense of \$696 thousand for general reserves. The largest segments included in the total provision expense for the six months ended June 30, 2017 were field crops (\$904 thousand expense), rural home loans (\$435 thousand expense), utilities (\$325 thousand reversal), and tree fruits and nuts (\$272 thousand reversal). For the three months ended June 30, 2016, the provision for loan losses included net provision reversals of \$786 thousand for specific reserves and provision expense of \$1.9 million for general reserves. For the six month period in 2016, the provision for loan losses included provision reversals of \$1.3 million for specific reserves and provision expense of \$3.3 million for general reserves. Provision expense for both periods in 2016 was primarily due to the adoption of an updated System probability of default curve which contained higher probabilities of default. This default curve is utilized in determining the amount of general allowance. For both the three and six month periods in 2016, provision expense was spread across multiple commodity groups, none of which were significant. See Note 2, Loans and Allowance for Loan Losses, in the Notes to the Financial Statements for further information.

#### Noninterest Income

The following table illustrates the changes in noninterest income:

Change in Noninterest Income	For the three months ended June 30,				For the six months ended June 30,							
					Increase/					I	ncrease/	
(dollars in thousands)	2017		2016		(Decrease)		2017		2016	(D	ecrease)	
Loan fees	\$ 2,048	\$	2,238	\$	(190)	\$	4,236	\$	4,522	\$	(286)	
Building lease income	1,012		845		167		1,927		1,725		202	
Net impairment losses on investments	-		_		_		-		(1,730)		1,730	
Gains (losses) on investments, net	(258)		_		(258)		(258)		620		(878)	
Gains (losses) on called debt	(2,641)		(10,729)		8,088		(3,081)		(17,937)		14,856	
Gains (losses) on other transactions	617		953		(336)		837		320		517	
Other noninterest income	1,519		1,270		249		3,315		2,846		469	
Total noninterest income	\$ 2,297	\$	(5,423)	\$	7,720	\$	6,976	\$	(9,634)	\$	16,610	

For the three and six months ended June 30, 2017 compared to the corresponding periods in 2016, noninterest income increased \$7.7 million and \$16.6 million, respectively. For both periods, the increase was primarily due to lower losses from called debt. For the six month period, lower impairment losses on investments also contributed to the increase in noninterest income, offset by lower gains on investments. Significant line item variances are discussed further below.

Debt issuance expense is amortized over the life of the underlying debt security. When debt securities are called prior to maturity, any unamortized issuance cost is expensed. Losses on called debt decreased \$8.1 million and \$14.9 million for the three and six month periods ended June 30, 2017, respectively, compared to the same periods in the prior year. Call options were exercised on bonds totaling \$1.125 billion and \$1.625 billion for the three and six month periods in 2017, respectively, compared to \$5.889 billion and \$9.107 billion for the same periods in 2016. Debt is called to take advantage of favorable market interest rate changes. The amount of debt issuance cost expensed is dependent upon both the volume and remaining maturity of the debt when called. Losses on called debt are more than offset by interest expense savings realized as called debt is replaced by new debt issued at a lower rate of interest.

Net impairment losses on investments decreased \$1.7 million for the six months ended June 30, 2017 compared to the corresponding period in the prior year. No impairment losses were recorded for the first six months of 2017. For the six months ended June 30, 2016, impairment losses of \$1.7 million were recorded on four non-agency collateralized mortgage obligation (CMO) securities. These losses reflected increased loss severities associated with foreclosures and bankruptcies for certain non-agency CMO bonds in the portfolio. See further discussion of investments in the *Liquidity and Funding Sources* section and Note 3, *Investments*, in the Notes to the Financial Statements.

For the six months ended June 30, 2017, gains on investments decreased \$878 thousand compared to the same period in 2016. In May 2017, the Bank sold securities totaling \$77.4 million which resulted in a net loss of \$258 thousand. In March, 2016, the Bank sold securities totaling \$15.0 million which resulted in gains totaling \$620 thousand. These transactions benefitted the Bank by reducing carrying costs and improving liquidity. See further discussion of investments in *Liquidity and Funding Sources* section above and in Note 3, *Investments*, in the Notes to the Financial Statements.

For the six months period ended June 30, 2017, gains on other transactions increased \$517 thousand primarily due to \$803 thousand in higher market value gains on certain retirement plan trust assets, partially offset by \$186 thousand in lower provision reversals for unfunded commitments. Changes in the reserve for unfunded commitments result from fluctuations in both the balance and composition of unfunded commitments between periods.

#### Noninterest Expenses

The following table illustrates the changes in noninterest expenses:

Change in Noninterest Expenses	F	e three mo led June 30			For the six months ended June 30,						
			In	crease/					In	crease/	
(dollars in thousands)	2017	2016	(D	ecrease)		2017		2016	(De	ecrease)	
Salaries and employee benefits	\$ 14,723	\$ 14,935	\$	(212)	\$	29,640	\$	29,316	\$	324	
Occupancy and equipment	5,573	5,371		202		10,998		10,519		479	
Insurance Fund premiums	3,724	3,821		(97)		7,079		7,494		(415)	
Other operating expenses	9,574	9,053		521		17,657		17,728		(71)	
Losses (gains) from other property owned	(22)	184		(206)		38		188		(150)	
Total noninterest expenses	\$ 33,572	\$ 33,364	\$	208	\$	65,412	\$	65,245	\$	167	

Noninterest expenses for the three and six months ended June 30, 2017 remained relatively constant, reflecting increases of \$208 thousand and \$167 thousand, respectively, compared to the corresponding periods in 2016. The increase for the three month period was primarily due to an increase of \$521 thousand in other operating expenses which was comprised of numerous and varied expenses, none of which had a significant change compared to the prior period. There were no other significant line item variances recognized for the three or six month periods ended June 30, 2017 compared to the corresponding periods in 2016.

#### REGULATORY MATTERS

#### Capital

The following quantitative disclosures contain regulatory disclosures as required for the Bank under Regulation 628.63 for risk-adjusted ratios: common equity tier 1, tier 1 capital and total capital ratios. As required, these disclosures are made available for at least three years and can be accessed via AgFirst's website at www.agfirst.com.

#### SCOPE OF APPLICATION

AgFirst Farm Credit Bank (AgFirst or the Bank) is one of the four banks of the Farm Credit System (System), a nationwide system of cooperatively owned Banks and Associations, established by Congress and subject to the provisions of the Farm Credit Act of 1971, as amended. The Bank prepares financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) and prevailing practices within the financial services industry.

As of June 30, 2017, the AgFirst District consisted of the Bank and 19 District Associations. All 19 were structured as Agricultural Credit Association (ACA) holding companies, with Production Credit Association (PCA) and Federal Land Credit Association (FLCA) subsidiaries. AgFirst is owned by these 19 Associations. The Bank does not have any subsidiaries requiring consolidation; therefore, there are no consolidated entities for which the total capital requirement is deducted, there are no restrictions on transfer of funds or total capital with other consolidated entities and no subsidiary exists which is below the minimum total capital requirement individually or when aggregated at the Bank's consolidated level. In conjunction with other System entities, the Bank jointly owns certain service organizations: the Federal Farm Credit Banks Funding Corporation (Funding Corporation), the FCS Building Association (FCSBA), and the Farm Credit Association Captive Insurance Corporation (Captive). Certain of the Bank's investments in other System institutions, including the investment in the Funding Corporation and FCSBA, are deducted from capital as only the institution who issued the equities may count the amount as capital.

#### **CAPITAL STRUCTURE**

The table below outlines the Bank's capital structure for the capital adequacy calculations as of June 30, 2017:

(dollars in thousands)	3-Month Average Daily Balance				
Common Equity Tier 1 Capital (CET1)					
Common Cooperative Equities:					
Statutory minimum purchased borrower stock	\$	23			
Other required member purchased stock		120,840			
Allocated equities:					
Qualified allocated equities subject to retirement		182,162			
Nonqualified allocated equities subject to retirement		555			
Nonqualified allocated equities not subject to retirement					
Unallocated retained earnings		1,947,420			
Paid-in capital		58,883			
Regulatory adjustments and deductions made to CET1		(66,989)			
Total CET1	\$	2,242,894			
Additional Tier 1 Capital (AT1)					
Non-cumulative perpetual preferred stock	\$	49,250			
Regulatory adjustments and deductions made to AT1		_			
Total AT1	\$	49,250			
Total Tier 1 Capital	\$	2,292,144			
Tier 2 Capital					
Allowance for Loan Losses	\$	15,386			
Reserve for unfunded commitments		724			
Regulatory adjustments and deductions made to total capital		_			
Total Tier 2 Capital	\$	16,110			
Total Capital	\$	2,308,254			

#### CAPITAL ADEQUACY AND CAPITAL BUFFERS

The table below outlines the Bank's risk-weighted assets by exposure (including accrued interest of that exposure) as of June 30, 2017:

	Risk-Weighted
(dollars in thousands)	Assets
Exposures to:	
Sovereign entities	\$ _
Supranational entities and MDBs	_
Government-sponsored entities, including Direct	
Notes to Associations	3,866,396
Depository institutions	19,475
Public sector entities	_
Corporate exposures, including borrower loans and	
leases	4,640,037
Residential mortgage loans	690,235
Past due > 90 days and nonaccrual loans	23,728
Cleared transactions	_
Unsettled transactions	_
Securitizations	204,561
Equity investments	_
Exposures to obligors and other assets	132,337
Off-balance sheet exposures	1,525,350
Total risk-weighted assets	\$ 11,102,119

As of June 30, 2017, the Bank was well-capitalized and exceeded all capital requirements to which it was subject, including applicable capital buffers. The Bank's capital conservation buffer was a minimum of 12.17 percent in excess of its risk-adjusted asset required minimum capital ratios. Additionally, the Bank's leverage ratio was 2.35 percent in excess of its required minimum leverage ratio, including the buffer. Since capital exceeded the buffer requirements, the Bank is not subject to payout ratio limitations on distributions or discretionary bonus payments under Basel III requirements. The aggregate amount of eligible retained income was \$74.4 million as of June 30, 2017.

The following sets forth the regulatory capital ratios as of June 30, 2017:

	Regulatory	Capital	Minimum	
	Minimum	Conservation	Requirement,	Capital Ratios as
Ratio	Requirement	Buffer	<b>Including Buffer</b>	of June 30, 2017
Risk-adjusted ratios:				
CET1 Capital*	4.5%	0.625%	5.125%	20.20%
Tier 1 Capital*	6.0%	0.625%	6.625%	20.65%
Total Capital*	8.0%	0.625%	8.625%	20.79%
Permanent Capital Ratio	7.0%	0.0%	7.0%	20.67%
Non-risk-adjusted:				
Tier 1 Leverage Ratio	4.0%	1.0%	5.0%	7.35%
UREE Leverage Ratio	1.5%	0.0%	1.5%	6.38%

<sup>\*</sup> The capital conservation buffers over risk-adjusted ratio minimums have a 3 year phase-in period and will become fully effective January 1, 2020. Risk-adjusted ratio minimums will increase 0.625% each year until fully phased in. There is no phase-in period for the tier 1 leverage ratio.

#### **CREDIT RISK**

System entities have specific lending authorities within their chartered territories. The Bank is subject to credit risk by lending to the District's FLCAs, PCAs, and ACAs. Allowance is determined at the individual entity basis based on loan or pool based on homogeneous characteristics such as probability of default (PD) and loss given default (LGD). Allowance needs by geographic region are only considered in rare circumstances that may not otherwise be reflected in the PD and LGD (flooding, drought, etc.) There was no allowance attributed to a geographic area as of

June 30, 2017. See Note 2, *Loans and Allowance for Loan Losses*, and Note 3, *Investments*, in the Notes to the Financial Statements for quantitative disclosures related to the Bank's credit risk.

#### CREDIT RISK MITIGATION

#### Credit Risk Mitigation Related to Loans

The most critical element in managing and controlling credit risk is the initial decision to make a loan and the resulting structure and terms of the relationship with the borrower. The Bank's approach in underwriting is to grant credit on the basis of capacity to repay rather than place primary reliance on credit risk mitigation. The Bank manages credit risk associated with lending activities through an assessment of the credit risk profile of individual obligors. The Bank sets underwriting standards and lending policies consistent with FCA regulations, which provide direction to loan officers and are approved by the Board of Directors.

The credit risk management process begins with an analysis of a potential obligor's credit history, repayment capacity and financial position. Repayment capacity focuses on the obligor's ability to repay the obligation based on cash flows from operations or other sources of income, including non-farm income. Excluding Direct Note balances, non-farm income represented 44 percent of primary income repayment sources at June 30, 2017 further mitigating credit risk. Real estate mortgage loans must be secured by first liens on the real estate collateral. As required by FCA regulations, each institution that makes loans on a secured basis must have collateral evaluation policies and procedures.

A substantial portion of the Bank's loan portfolio consists of notes receivable from District Associations. As described in Note 1 of the Bank's 2016 Annual Report, these notes are used by the Associations to fund their earning assets, which collateralize the notes. Therefore, the Bank's concentration of credit risk in various agricultural commodities associated with these notes approximates that of the District as a whole. Loan concentrations are considered to exist when there are amounts loaned to a multiple number of borrowers engaged in similar activities, which would cause them to be similarly impacted by economic or other conditions. A substantial portion of the Associations' lending activities is collateralized, and their exposure to credit loss associated with lending activities is reduced accordingly, which further mitigates credit risk to the Bank.

Through their participation in loans or interests in loans to/from other institutions within the System and outside the System, the Bank and District Associations limit their exposure to both borrower and commodity concentrations. This also allows the Bank and District Associations to manage growth and capital, and to improve geographic diversification. Concentration risk is reviewed and measured by industry, product, geography and customer limits.

Although neither the Bank nor any other System institution receives any direct government support, credit quality is indirectly enhanced by government support in the form of program payments to borrowers, which improve their ability to honor their commitments. However, due to the geographic location of the District and the resulting types of agriculture, government programs account for a relatively small percentage of net farm income in the territory served by the District Associations.

An additional technique to reduce credit risk is AgFirst's monitoring for commodity and geographic concentrations. The Associations' credit portfolios are comprised of a number of segments having varying, and in some cases complementary, agricultural characteristics. Commodity and industry categories are based on the Standard Industrial Classification system published by the federal government. This system is used to assign commodity or industry categories based on the largest agricultural commodity of the customer.

The following table illustrates AgFirst's loan portfolio by geographic distribution at June 30, 2017. This table excludes the Bank's Direct Notes and loans to OFI portfolios.

(dollars in thousands)		
North Carolina	\$ 1,159,561	16%

The Bank also has guarantees in the corresponding loan portfolio from the Federal National Mortgage Association (Fannie Mae) and/or Farmer Mac, thereby limiting credit risk to AgFirst. The guarantees are in the form of Long-Term Standby Commitments to Purchase, which give AgFirst the right to deliver delinquent loans to the guarantor at par. The Fannie Mae guarantee program in which AgFirst participated ended on July 31, 2013. Subsequent to this date, new loans in this portfolio purchased by the Bank are held without a Fannie Mae guarantee. As of June 30, 2017, \$1.521 billion, or 51.08 percent, of loans in the Correspondent Lending portfolio were guaranteed and \$1.456 billion, or 48.92 percent, were unguaranteed. The discontinuation of the Fannie Mae guarantee program is reflected in the Bank's allowance for loan losses methodology related to this portfolio.

The Bank does not use credit default swaps as part of its credit risk management approaches.

#### Credit Risk Mitigation Related to Investments

Credit risk in our investment portfolio is largely mitigated by investing primarily in securities issued or guaranteed by the U.S. government or one of its agencies. As of June 30, 2017, 59.29 percent of the \$8.0 billion investment portfolio consisted of securities that carry a full faith and credit guarantee of the U.S. government. Such securities include mortgage-backed securities (MBSs) issued by the Government National Mortgage Association (Ginnie Mae), Export-Import Bank of the United States securities and U.S. Treasury and other debt securities. These securities that carry a full faith and credit guarantee are risk-weighted at 0 percent for capital purposes. Approximately 32.22 percent of the investment portfolio consisted of securities issued by government agencies that carry the implicit backing of the U.S. government, including MBSs issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and Farmer Mac. These securities that carry the implicit backing of U.S. government are risk-weighted at 20 percent for capital purposes.

Credit risk in our investment portfolio primarily relates to the 8.49 percent of the portfolio composed of asset-backed securities (ABS), Rural Housing MBS (RHMS) and Rural America Bonds (RABs). The ABS securities must meet the applicable FCA regulatory guidelines, which require them to be high quality, senior class, and rated in the top category (AAA/Aaa) by Nationally Recognized Statistical Rating Organizations (NRSROs) at the time of purchase. To achieve these ratings, the securities may have a guarantee of timely payment of principal and interest, credit enhancements achieved through over-collateralization or other means, priority of payments for senior classes over junior classes, or bond insurance.

All of the non-agency securities owned have one or more credit enhancement features. The RHMS portfolio must be fully guaranteed by a government agency or government sponsored enterprise. RABs are private placement securities, which generally have some form of credit enhancement.

#### COUNTERPARTY CREDIT RISK

See Note 10, *Derivative Financial Instruments and Hedging Activities*, in the Notes to the Financial Statements for further information on counterparty exposures related to derivatives as of June 30, 2017.

#### **SECURITIZATION**

The Bank has elected to utilize the simplified supervisory formula risk-based capital approach (SSFA) for securitization exposures. As such, the Bank's asset-backed securities portfolio is risk weighted on an individual security level. As of June 30, 2017, the ABS risk-weights ranged from 20.00 percent to 100.00 percent, with a weighted average risk-weight of 29.50 percent.

As of June 30, 2017, the Bank did not hold any off-balance sheet securitization exposures nor were any securitization exposures deducted from capital.

Refer to Note 3, *Investments*, in the Notes to the Financial Statements for additional information related to purchases and sales of securitization exposures as well as the amortized cost, unrealized gains/(losses) and fair value of MBS and ABS held in the investment portfolio.

#### **EQUITIES**

The Bank does not have any equity investment risk within its portfolio.

#### INTEREST RATE RISK

The following tables represent AgFirst's market value of equity and projected change over the next twelve months in net interest income for various rate movements as of June 30, 2017:

### **Net Interest Income** (dollars in thousands)

st For interest rate risk management, the \$49.3 million perpetual preferred stock is included in liabilities rather than equity.

<sup>\*\*</sup>Base line uses rates as of the balance sheet date before application of any interest rate shocks.

<sup>\*\*\*</sup>When the three-month Treasury bill interest rate is less than 4 percent, both the minus 200 and minus 400 basis point shocks are replaced with a downward shock equal to one-half of the three-month Treasury bill rate which is 25 basis points.

#### **Other Regulatory Matters**

On July 25, 2014, the FCA published a proposed rule in the Federal Register to revise the requirements governing the eligibility of investments for System banks and associations. The public comment period ended on October 23, 2014. The FCA expects to issue a final regulation by year-end 2017. The stated objectives of the proposed rule are as follows:

- To strengthen the safety and soundness of System banks and associations,
- To ensure that System banks hold sufficient liquidity to continue operations and pay maturing obligations in the event of market disruption,
- To enhance the ability of the System banks to supply credit to agricultural and aquatic producers,
- To comply with the requirements of Section 939A of the Dodd-Frank Act,
- To modernize the investment eligibility criteria for System banks, and
- To revise the investment regulation for System associations to improve their investment management practices so they are more resilient to risk.

#### SENIOR MANAGEMENT APPOINTMENTS

As previously communicated in the 2016 AgFirst Annual Report, Benjamin F. Blakewood, Senior Vice President and Chief Information Officer, and Christopher L. Jones, Senior Vice President and Chief Credit Officer, confirmed their intentions to retire from the Bank in 2017 and a search was conducted for their replacements. As a result of the search, AgFirst Farm Credit Bank has hired Will Brown as Senior Vice President and Chief Credit Officer effective August 3, 2017 and Sam Esfahani as Senior Vice President and Chief Information Officer effective August 28, 2017. A press release which contains additional information about Will Brown and Sam Esfahani is available on AgFirst's website at <a href="https://www.agfirst.com">www.agfirst.com</a>.

#### RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Please refer to Note 1, *Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements*, in the Notes to the Financial Statements, and the 2016 Annual Report of AgFirst Farm Credit Bank for recently issued accounting pronouncements.

**NOTE:** Shareholder investment in a District Association is materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst's annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2764, or writing Matthew Miller, Director of Financial Reporting and ICFR, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Combined information concerning AgFirst Farm Credit Bank and District Associations can also be obtained at the Bank's website, *www.agfirst.com*. AgFirst prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no quarterly report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

#### Note 1 — Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements

#### **Organization**

The accompanying financial statements include the accounts of AgFirst Farm Credit Bank (AgFirst or Bank). AgFirst and its related Agricultural Credit Associations (Associations or District Associations) are collectively referred to as the AgFirst District (District). A complete description of the organization and operations, the significant accounting policies followed, and the financial condition and results of operations of the Bank as of and for the year ended December 31, 2016 are contained in the 2016 Annual Report to Shareholders. These unaudited interim financial statements should be read in conjunction with the latest Annual Report to Shareholders.

#### Basis of Presentation

In the opinion of management, the accompanying financial statements contain all adjustments necessary for a fair statement of results for the periods presented. These adjustments are of a normal recurring nature, unless otherwise disclosed.

Certain amounts in the prior period's financial statements have been reclassified to conform to the current period presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The results of any interim period are not necessarily indicative of those to be expected for a full year.

#### Significant Accounting Policies

The Bank's accounting and reporting policies conform with U.S. generally accepted accounting principles (GAAP) and practices in the financial services industry. To prepare the financial statements in conformity with GAAP, management must make estimates based on assumptions about future economic and market conditions (for example, unemployment, market liquidity, real estate prices, etc.) that affect the reported amounts of assets and liabilities at the date of the financial statements, income and expenses during the reporting period, and the related disclosures. Although these estimates contemplate current conditions and expectations of change in the future, it is reasonably possible that actual conditions may be different than anticipated, which could materially affect results of operations and financial condition.

Management has made significant estimates in several areas, including loans and allowance for loan losses (Note 2, *Loans and Allowance for Loan Losses*), investment securities and other-than-temporary impairment (Note 3, *Investments*), and financial instruments (Note 6, *Fair Value Measurement*). Actual results could differ from those estimates.

For further details of significant accounting policies, see Note 2, Summary of Significant Accounting Policies, from the latest Annual Report.

#### Accounting Standards Updates (ASUs) Issued During the Period

The following ASUs were issued by the Financial Accounting Standards Board (FASB) since the most recent Annual Report:

• In March 2017, the FASB issued ASU 2017-08 Receivables—Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities. The guidance relates to certain callable debt securities and shortens the amortization period for any premium to the earliest call date. The Update will be effective for interim and annual periods beginning after December 15, 2018 for public business entities. Early adoption is permitted. The Bank is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.

- In February 2017, the FASB issued ASU 2017-05 Other Income—Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets. The Update clarifies whether certain transactions are within the scope of the guidance on derecognition and the accounting for partial sales of nonfinancial assets, and defines the term in substance nonfinancial asset. The amendments conform the derecognition guidance on nonfinancial assets with the model for transactions in the new revenue recognition standard. The amendments will be effective for reporting periods beginning after December 15, 2017 for public business entities. The Bank is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.
- In January 2017, the FASB issued ASU 2017-04 Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. The Update simplifies the accounting for goodwill impairment for public business entities and other entities that have goodwill reported in their financial statements and have not elected the private company alternative for the subsequent measurement of goodwill. The amendment removes Step 2 of the goodwill impairment test. Goodwill impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. The effective date and transition requirements for the technical corrections will be effective for reporting periods beginning after December 15, 2020 for public business entities that are not SEC filers. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The Bank does not expect these amendments to have a material effect on its financial statements.
- In January 2017, the FASB issued ASU 2017-03 Accounting Changes and Error Corrections (Topic 250) and Investments—Equity Method and Joint Ventures (Topic 323): Amendments to SEC Paragraphs Pursuant to Staff Announcements at the September 22, 2016 and November 17, 2016 EITF Meetings (SEC Update). The ASU incorporates recent SEC guidance about disclosing, under SEC SAB Topic 11.M, the effect on financial statements of adopting the revenue, leases, and credit losses standards. The Update was effective upon issuance. Application of this guidance is not expected to have a material impact on the Bank's financial condition or results of operations.

#### ASUs Pending Effective Date

For a detailed description of the ASUs below, see the latest Annual Report.

Potential effects of ASUs issued in previous periods:

- 2017-01 Business Combinations (Topic 805): Clarifying the Definition of a Business. In January, 2017, the FASB issued this update to provide a more robust framework to use in determining when a set of assets and activities is a business. It supports more consistency in applying the guidance, reduces the costs of application, and makes the definition of a business more operable. For public business entities, the ASU is effective for annual periods beginning after December 15, 2017, including interim periods within those periods. The amendments should be applied prospectively. The Bank is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.
- 2016-16 Income Taxes (Topic 740) Intra-Entity Transfers of Assets Other Than Inventory: In October, 2016, the FASB issued this Update that requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. For public business entities, the amendments are effective, on a modified retrospective basis, for annual reporting periods beginning after December 15, 2017, including interim reporting periods within those annual reporting periods. The Bank is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.

2016-13 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments: In June, 2016, the FASB issued this Update to improve financial reporting by requiring timelier recording of credit losses on financial instruments. It requires an organization to measure all expected credit losses for financial assets held at the reporting date. Financial institutions and other organizations will use forward-looking information to better estimate their credit losses. Additionally, the ASU amends the accounting

for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. For public companies that are not SEC filers, it will take effect for fiscal years beginning after December 15, 2020, and interim periods within those fiscal years. Early application will be permitted for all organizations for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Bank is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.

- 2016-07 Investments Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting. In March, 2016, the FASB issued this Update to simplify the accounting for equity method investments. The amendments eliminate the requirement that an entity retroactively adopt the equity method of accounting if an investment qualifies for use of the equity method as a result of an increase in the level of ownership or degree of influence. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. Earlier application is permitted. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method. The Bank is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.
- 2016-02 Leases (Topic 842): In February, 2016, the FASB issued this Update which requires organizations that lease assets to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases. Leases will be classified as either finance leases or operating leases. This distinction will be relevant for the pattern of expense recognition in the income statement. The amendments will be effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years for public business entities. Early adoption is permitted. The Bank is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.
- 2016-01 Financial Instruments Overall (Subtopic 825-10) Recognition and Measurement of Financial Assets and Financial Liabilities: In January, 2016, the FASB issued this Update which is intended to improve the recognition and measurement of financial instruments. The new guidance makes targeted improvements to existing GAAP. The ASU will be effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years for public business entities. The Bank is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.
- 2014-09 Revenue from Contracts with Customers (Topic 606): In May 2014, the FASB issued this guidance to change the recognition of revenue from contracts with customers. The core principle of the new guidance is that an entity should recognize revenue to reflect the transfer of goods and services to customers in an amount equal to the consideration the entity receives or expects to receive. This guidance also includes expanded disclosure requirements that result in an entity providing users of financial statements with comprehensive information about the nature, amount, timing, and uncertainty of revenue and cash flows arising from the entity's contracts with customers. Based on input received from stakeholders, the FASB has issued several additional Updates that generally provide clarifying guidance where there was the potential for diversity in practice, or address the cost and complexity of applying Topic 606. The guidance and all related updates will be effective for reporting periods beginning after December 15, 2017 for public business entities. Early application is not permitted. The amendments are to be applied retrospectively. The Bank has identified ancillary revenues that will be affected by this Update. However, because financial instruments are not within the scope of the guidance, it is expected that adoption will not have a material impact on the Bank's financial condition or results of operations, but may result in additional disclosures.

#### Accounting Standards Effective During the Period

There were no changes in the accounting principles applied from the latest Annual Report, other than any discussed below.

No recently adopted accounting guidance issued by the FASB had a significant effect on the current period reporting. See the most recent Annual Report for a detailed description of each of the standards below:

- 2016-18 Statement of Cash Flows (Topic 230): Restricted Cash. In November, 2016, the FASB issued this Update to clarify that amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted using a retrospective transition method to each period presented. The Bank elected retrospective early adoption of this guidance. The criteria of the standard were not significantly different from the Bank's policy in place at adoption. Application of the guidance had no impact on the Bank's Statements of Cash Flows.
- 2016-17 Consolidation (Topic 810) Interests Held through Related Parties That Are under Common Control: In October, 2016, the FASB issued this Update to amend the consolidation guidance on how a reporting entity that is the single decision maker of a variable interest entity (VIE) should treat indirect interests in the entity held through related parties that are under common control with the reporting entity when determining whether it is the primary beneficiary of that VIE. The amendments are effective for public business entities for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Application of the guidance had no impact on the Bank's financial statements.
- 2016-15 Statement of Cash Flows (Topic 230) Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force): In August, 2016, the FASB issued this Update to eliminate diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The Update addresses eight specific cash flow issues with the objective of reducing existing diversity in practice. The amendments are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. An entity that elects early adoption must adopt all of the amendments in the same period. The amendments are to be applied using a retrospective transition method to each period presented. The Bank elected retrospective early adoption of this guidance. The criteria of the standard were not significantly different from the Bank's policy in place at adoption. Application of the guidance had no impact on the Bank's Statements of Cash Flows.
- In March, 2016, the FASB issued ASU 2016-06 Derivatives and Hedging (Topic 815): Contingent Put and Call Options in Debt Instruments to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. The Update requires the assessment to be done solely in accordance with the four-step decision sequence. The amendments were effective for financial statements issued for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. The amendments were applied on a modified retrospective basis to existing debt instruments at the beginning of the fiscal year. The criteria of the standard were not significantly different from the Bank's policy in place at adoption. Application of the guidance had no impact on the Bank's financial statements.
- In March, 2016, the FASB issued ASU 2016-05 Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships. The term novation refers to replacing one counterparty to a derivative instrument with a new counterparty. The amendments clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument under Topic 815, does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. The amendments were effective for financial statements issued for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. The amendments were applied on a prospective basis. The criteria of the standard were not significantly different from the Bank's policy in place at adoption. Application of the guidance had no impact on the Bank's financial statements.

#### Note 2 — Loans and Allowance for Loan Losses

The Bank maintains an allowance for loan losses at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio as of the report date. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through loan charge-offs and allowance reversals. A review of individual loans in each respective portfolio is performed periodically to determine the appropriateness of risk ratings and to ensure loss exposure to the Bank has been identified. See Note 3, *Loans and Allowance for Loan Losses*, from the latest Annual Report for further discussion.

Credit risk arises from the potential inability of an obligor to meet its repayment obligation. The Bank manages credit risk associated with lending activities through an assessment of the credit risk profile of an individual obligor. The Bank sets its own underwriting standards and lending policies that provide direction to loan officers and are approved by the board of directors.

A summary of loans outstanding at period end follows:

(dollars in thousands)	June 30, 2017	December 31, 2016
Direct notes	\$ 15,519,675	\$ 15,480,715
Real estate mortgage	1,072,004	1,056,241
Production and intermediate-term	1,000,621	1,247,467
Loans to cooperatives	475,435	480,944
Processing and marketing	833,239	848,750
Farm-related business	74,304	68,903
Communication	242,933	239,580

Rural residential real estate	2,842,798	2,754,273
International	59,250	54,837
Lease receivables	7,408	8,054
Loans to other financing institutions (OFIs)	138,221	122,573
Other (including Mission Related)	8,961	9,293
Total Loans	\$ 22,826,878	\$ 22,914,682

A substantial portion of the Bank's loan portfolio consists of notes receivable from District Associations (Direct Notes). These notes are used by the Associations to fund their loan portfolios, which collateralize the notes. Therefore, the Bank's concentration of credit risk in various agricultural commodities associated with these notes approximates that of the District as a whole. Loan concentrations are considered to exist when there are amounts loaned to a multiple number of borrowers engaged in similar activities, which would cause them to be similarly impacted by economic or other conditions. A substantial portion of the Associations' lending activities is collateralized, and their exposure to credit loss associated with lending activities is reduced accordingly. The risk funds of an Association, including both capital and the allowance for loan losses, also protect the interest of the Bank.

The Bank may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with FCA regulations. During the first quarter of 2017, two Associations canceled their participation in the Capitalized Participation Pool program with the Bank. As a result, the Associations repurchased \$16.7 million of participations previously sold to AgFirst. The following tables present the principal balance of participation loans at periods ended:

20 2015

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. The following tables present additional information about pre-modification and post-modification outstanding recorded investment and the effects of the modifications that occurred during the periods presented. The tables do not include any purchased credit impaired loans.

#### Note 3 — Investments

#### **Investment Securities**

AgFirst's investments consist primarily of mortgage-backed securities (MBSs) collateralized by U.S. government or U.S. agency guaranteed residential and commercial mortgages. They are held to maintain a liquidity reserve, manage short-term surplus funds, and manage interest rate risk. These securities meet the applicable FCA regulatory guidelines related to government agency guaranteed investments.

Included in the available-for-sale investments are collateralized mortgage obligations (CMOs) and asset-backed securities (ABSs). These securities must meet the applicable FCA regulatory guidelines, which require them to be high quality, senior class, and rated in the top category (AAA/Aaa) by Nationally Recognized Statistical Rating Organizations (NRSROs) at the time of purchase. To achieve these ratings, the securities may have a guarantee of timely payment of principal and interest, credit enhancements achieved through over-collateralization or other means, priority of payments for senior classes over junior classes, or bond insurance. All of the non-agency securities owned have one or more credit enhancement features.

The FCA considers a non-agency security ineligible if it falls below AAA/Aaa credit rating criteria and requires Farm Credit System (System) institutions to provide notification to the FCA when a security becomes ineligible. In August, 2016, the Bank disposed of its non-agency CMO and ABS securities not rated in the top category by at least one of the NRSROs.

Held-to-maturity investments consist of Mission Related Investments acquired primarily under the Rural Housing Mortgage-Backed Securities (RHMS) and Rural America Bond (RAB) pilot programs. RHMS must be fully guaranteed by a government agency or government sponsored enterprise. RABs are private placement securities, which generally have some form of credit enhancement.

In its Conditions of Approval for the program, the FCA considers an RAB ineligible if its investment rating, based on the internal 14-point risk rating scale used to also grade loans, falls below 9. The FCA requires System institutions to provide notification when a security becomes ineligible. At June 30, 2017, the Bank held one RAB whose credit quality had deteriorated beyond the program limits.

Effective December 31, 2014, the FCA ended the pilot programs approved after 2004 as part of the Investment in Rural America initiative. Each institution participating in such programs may continue to hold its investment through the maturity dates for the investments, provided the institution continues to meet all approval conditions. The FCA can consider future participation in these programs on a case-by-case basis.

An agreement with a commercial bank requires AgFirst to maintain \$50.0 million as a compensating balance. The Bank holds \$42.2 million in U.S. Treasury securities for that purpose. The remainder of the compensating balance is held in cash in a demand deposit account. These securities are excluded when calculating the amount of eligible liquidity investments.

During the first six months of 2017, proceeds from sales of investments were \$77.2 million and realized losses were \$258 thousand. During the first six months of 2016, proceeds from sales of investments were \$16.0 million and realized gains were \$620 thousand.

### Available-for-sale

A substantial portion of these investments has contractual maturities in excess of ten years. However, expected maturities for these types of securities will differ from contractual maturities because borrowers may have the right to prepay obligations with or without prepayment penalties.

An investment is considered impaired if its fair value is less than its cost. This also applies to those securities other-than-temporarily impaired for which a credit loss has been recognized but noncredit-related losses continue to remain unrealized. The following tables show the fair value and gross unrealized losses for all investments that have been in a continuous unrealized loss position aggregated by investment category at each reporting period. A continuous unrealized loss position for an investment is measured from the date the impairment was first identified.

1 21 2017

The recording of an impairment is predicated on: (1) whether or not management intends to sell the security, (2) whether it is more likely than not that management would be required to sell the security before recovering its costs, and (3) whether management expects to recover the security's entire amortized cost basis (even if there is no intention to sell). If the Bank intends to sell the security or it is more likely than not that it would be required to sell the security, the impairment loss recognized equals the full difference between amortized cost and fair value of the security. When the Bank does not intend to sell securities in an unrealized loss position and it is not more likely than not that it would be required to sell the securities, other-than-temporary impairment loss is separated into credit loss and noncredit loss. Credit loss is defined as the shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis.

The Bank performs periodic credit reviews, including other-than-temporary impairment (OTTI) analyses, on its investment securities portfolio. The objective is to quantify future possible loss of principal or interest due on securities in the portfolio. Factors considered in determining whether an impairment is other-than-temporary include among others: (1) the length of time and the extent to which the fair value is less than cost, (2) adverse conditions specifically related to the industry, (3) geographic area and the condition of the underlying collateral, (4) payment structure of the security, (5) ratings by rating agencies, (6) the creditworthiness of bond insurers, and (7) volatility of the fair value changes.

The Bank uses the present value of cash flows expected to be collected from each debt security to determine the amount of credit loss. This technique requires assumptions related to the underlying collateral, including default rates, amount and timing of prepayments, and loss severity. Assumptions can vary widely from security and are influenced by such factors as loan interest rate, geographical location of the borrower, borrower characteristics, and collateral type.

Significant inputs used to estimate the amount of credit loss include, but are not limited to, performance indicators of the underlying assets in the security (including default rates, delinquency rates, and percentage of nonperforming assets), loan-to-collateral value ratios, third-party guarantees, current levels of subordination, vintage, geographic concentration, and credit ratings. The Bank obtains assumptions for the default rate, prepayment rate, and loss severity rate from an independent third party.

Based on the credit reviews discussed above, none of the securities currently in the Bank's portfolio were determined to be other-than-temporarily impaired.

When the Bank does not intend to sell other-than-temporarily impaired debt securities and is not more likely than not to be required to sell before recovery, the total OTTI is reflected in the Statements of Income with: (1) a net other-than-temporary impairment amount related to estimated credit loss, and (2) an amount relating to all other factors, recognized as a reclassification to or from Other Comprehensive Income (OCI).

For the six months ended June 30, 2017, net unrealized gains of \$829 thousand were recognized in OCI on available-for-sale investments that are not other-than-temporarily impaired.

The following schedule details the activity related to cumulative credit losses on investments recognized in earnings for which a portion of an other-than-temporary impairment was recognized in OCI:

	For	the three mor	nths ei	nded June 30,	For the six months ended June 30,						
(dollars in thousands)		2017		2016		2017	2016				
Amount related to credit loss-beginning balance	\$	_	\$	57,867	\$	- \$	56,692				
Additions for initial credit impairments		_		_		_	_				
Additions for subsequent credit impairments		_		_		-	1,730				
Reductions for increases in expected cash flows		_		(924)		_	(1,479)				
Reductions for securities sold/settled/matured		_		_		-					
Amount related to credit loss-ending balance	\$	_	\$	56,943	\$	- \$	56,943				
Life to date incurred credit losses		_		(22,073)		_	(22,073)				
Remaining unrealized credit losses	\$	_	\$	34,870	\$	- \$	34,870				

For all other impaired investments, the Bank has not recognized any credit losses as the impairments are deemed temporary and result from non-credit related factors. The Bank has the ability and intent to hold these investments

until a recovery of unrealized losses occurs, which may be at maturity, and at this time expects to collect the full principal amount and interest due on these securities. Substantially all of these investments were in U.S. government agency securities and the Bank expects these securities would not be settled at a price less than their amortized cost.

#### Note 4 — Debt

#### **Bonds and Notes**

AgFirst, unlike commercial banks and other depository institutions, obtains funds for its lending operations primarily from the sale of Systemwide Debt Securities issued jointly by the System banks through the Funding Corporation. Certain conditions must be met before AgFirst can participate in the issuance of Systemwide Debt Securities. As one condition of participation, AgFirst is required by the Farm Credit Act and FCA regulations to maintain specified eligible assets at least equal in value to the total amount of debt obligations outstanding for which it is primarily liable. This requirement does not provide holders of Systemwide Debt Securities with a security interest in any assets of the banks.

In accordance with FCA regulations, each issuance of Systemwide Debt Securities ranks equally with other unsecured Systemwide Debt Securities. Systemwide Debt Securities are not issued under an indenture and no trustee is provided with respect to these securities. Systemwide Debt Securities are not subject to acceleration prior to maturity upon the occurrence of any default or similar event.

The System may issue the following types of Systemwide Debt Securities:

- Federal Farm Credit Banks Consolidated Systemwide Bonds,
- Federal Farm Credit Banks Consolidated Systemwide Discount Notes,
- Federal Farm Credit Banks Consolidated Systemwide Master Notes,
- Federal Farm Credit Banks Global Debt Securities, and
- Federal Farm Credit Banks Consolidated Systemwide Medium-Term Notes.

Additional information regarding Systemwide Debt Securities can be found in their respective offering circulars.

The following table provides a summary of AgFirst's participation in outstanding Systemwide Debt Securities by maturity. Weighted average interest rates include the effect of related derivative financial instruments.

_			June 30,	2017

Total	\$ 22,916,228	1.49%	\$ 6,010,648	0.97%	\$	28,926,876	1.39%

Discount notes are issued with maturities ranging from 1 to 365 days. The average maturity of discount notes at June 30, 2017 was 163 days.

# Note 5 — Shareholders' Equity

#### Perpetual Preferred Stock

Payment of dividends or redemption price on issued Preferred Stock may be restricted if the Bank fails to satisfy applicable minimum capital adequacy, surplus, and collateral requirements.

During 2016, the Bank repurchased through privately negotiated transactions, and subsequently cancelled, Class B Perpetual Non-Cumulative Fixed-to-Floating Rate Subordinated Preferred Stock with a par value totaling \$65.8 million. The effect of the repurchases on shareholders' equity was to reduce preferred stock outstanding by \$65.8 million and to increase additional paid-in capital by \$18.9 million.

<sup>(</sup>a) Amounts in parentheses indicate debits to AOCI.

## Note 6 — Fair Value Measurement

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

<sup>(</sup>b) Amounts in parentheses indicate debits to profit/loss.

Accounting guidance establishes a hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the hierarchy tiers is based upon the lowest level of input that is significant to the fair value measurement.

The classifications within the fair value hierarchy are as follows:

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets. Level 1 assets and liabilities could include investment securities and derivative contracts that are traded in an active exchange market, in addition to certain U.S. Treasury securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2 inputs include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. Level 2 assets and liabilities could include investment securities that are traded in active, non-exchange markets and derivative contracts that are traded in active, over-the-counter markets.

Level 3 inputs are unobservable and supported by little or no market activity. Level 3 assets and liabilities could include investments and derivative contracts whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, and other instruments for which the determination of fair value requires significant management judgment or estimation. Level 3 assets and liabilities could also include investments and derivative contracts whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

For a complete discussion of the inputs and other assumptions considered in assigning various assets and liabilities to the fair value hierarchy levels, see the most recent Annual Report to Shareholders.

On December 31, 2016, agency collateralized CMOs with a fair value of \$27.6 million were transferred into Level 3 to reflect a change in valuation technique. The modeling technique previously used to value them was no longer available, the bonds were nearing end of life, and third-party valuation services generally would not provide prices for them. The Bank began employing a valuation technique based on multiple factors including information obtained from broker-dealers using Level 3 inputs.

The following table presents the changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the periods presented. Except as described above, the Bank had no transfers of assets or liabilities measured on a recurring basis into or out of Level 1 or Level 2 during the reporting period.

(dollars in thousands)	C	Agency Collateralized CMOs
Balance at December 31, 2016	\$	27,582
Gains or (losses) included in earnings		(446)
Gains or (losses) included in OCI		634
Purchases		_
Sales		(24,981)
Settlements		(2,789)
Transfers in and/or out of Level 3		_
Balance at June 30, 2017	\$	_

Fair values are estimated at each period end date for assets and liabilities measured at fair value on a recurring basis. Fair values are estimated at least annually, or when information suggests a significant change in value, for assets measured at fair value on a nonrecurring basis. Other Financial Instruments are not measured at fair value in the statement of financial position, but their fair values are estimated as of each period end date. The following tables summarize the carrying amounts of these assets and liabilities at period end, and their related fair values.

### SENSITIVITY TO CHANGES IN SIGNIFICANT UNOBSERVABLE INPUTS

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated with one another), which may counteract or magnify the fair value impact.

### **Investment Securities**

The fair values of predominantly all Level 3 investment securities have consistent inputs, valuation techniques and correlation to changes in underlying inputs. The models used to determine fair value for these instruments use certain significant unobservable inputs within a discounted cash flow or market comparable pricing valuation technique. Such inputs generally include discount rate components including risk premiums, prepayment estimates, default estimates and loss severities.

These Level 3 assets would decrease (increase) in value based upon an increase (decrease) in discount rates, defaults, or loss severities. Conversely, the fair value of these assets would generally increase (decrease) in value if the prepayment input were to increase (decrease). Generally, a change in the assumption used for defaults is accompanied by a directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change in the assumption used for prepayments. Unobservable inputs for loss severities do not normally increase or decrease based on movements in the other significant unobservable inputs for these Level 3 assets.

### **Derivative Instruments**

Level 3 derivative instruments consist of forward contracts that represent a hedge of an unrecognized firm commitment to purchase agency securities at a future date. The value of the forward is the difference between the fair value of the security at inception of the forward and the measurement date. Significant inputs for these valuations would be discount rate and volatility. These Level 3 derivatives would decrease (increase) in value based upon an increase (decrease) in the discount rate.

Generally, for derivative instruments which are subject to changes in the value of the underlying referenced instrument, change in the assumption used for default rate is accompanied by directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change in the assumption used for prepayment rates.

Unobservable inputs for discount rate and volatility do not increase or decrease based on movements in other significant unobservable inputs for these Level 3 instruments.

### **Inputs to Valuation Techniques**

Management determines the Bank's valuation policies and procedures. Internal valuation processes are calibrated annually by an independent consultant. Fair value measurements are analyzed on a periodic basis. Documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing.

Quoted market prices are generally not available for the instruments presented below. Accordingly, fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Quantitative Information about Recurring and Nonrecurring Level 3 Fair Value Measurements

	Fa	air Value	Valuation Technique(s)	Unobservable Input	Range
Investments available-for-sale	\$	_	Vendor priced	Price adjustment	-1.000
Impaired loans and other property owned	\$	38,245	Appraisal	Income and expense	*
				Comparable sales	*
				Replacement cost	*
				Comparability adjustments	*

## Note 7 — Employee Benefit Plans

Following are retirement and other postretirement benefit expenses for the Bank:

	For the thi ended J		For the six months ended June 30,					
(dollars in thousands)	2017	2016		2017		2016		
Pension	\$ 1,477	\$ 2,255	\$	2,954	\$	4,510		
401k	709	644		1,390		1,244		
Other postretirement benefits	 250	357		507		713		
Total	\$ 2,436	\$ 3,256	\$	4,851	\$	6,467		

Following are retirement and other postretirement benefit contributions for the Bank. Projections are based upon actuarially determined amounts as of the most recent measurement date of December 31, 2016.

(dollars in thousands)	T	Actual YTD hrough 5/30/17	Con for 1	rojected atributions Remainder of 2017	Projected Total intributions 2017
Pensions	\$	279	\$	4,568	\$ 4,847
Other postretirement benefits		514		487	1,001
Total	\$	793	\$	5,055	\$ 5,848

Contributions in the above table include allocated estimates of funding for multiemployer plans in which the Bank participates. These amounts may change when a total funding amount and allocation is determined by the respective Plans' Sponsor Committees. Also, market conditions could impact discount rates and return on plan assets which could change contributions necessary before the next plan measurement date of December 31, 2017.

Further details regarding employee benefit plans are contained in the most recent Annual Report to Shareholders. As of March 31, 2017, the AgFirst Farm Credit Cash Balance Retirement Plan had been terminated and all vested benefits had been distributed to participants.

### Note 8 — Commitments and Contingencies

Under the Farm Credit Act of 1971, each System bank is primarily liable for its portion of Systemwide bond and discount note obligations. Additionally, the four banks are jointly and severally liable for the bonds and notes of the other System banks under the terms of the Joint and Several Liability Allocation Agreement. Published in the Federal Register, the agreement prescribes the payment mechanisms to be employed in the event one of the banks is unable to meet its debt obligations.

In the event a bank is unable to timely pay principal or interest on an insured debt obligation for which the bank is primarily liable, the Farm Credit System Insurance Corporation (FCSIC) must expend amounts in the Insurance Fund to the extent available to ensure the timely payment of principal and interest on the insured debt obligation. The provisions of the Farm Credit Act providing for joint and several liability of the banks on the obligation cannot be invoked until the amounts in the Insurance Fund have been exhausted. However, because of other mandatory and discretionary uses of the Insurance Fund, there is no assurance that there will be sufficient funds to pay the principal or interest on the insured debt obligation.

Once joint and several liability provisions are initiated, the FCA is required to make "calls" to satisfy the liability first on all non-defaulting banks in the proportion that each non-defaulting bank's available collateral (collateral in excess of collateralized obligations) bears to the aggregate available collateral of all non-defaulting banks. If these calls do not satisfy the liability, then a further call would be made in proportion to each non-defaulting bank's remaining assets. Upon making a call on non-defaulting banks with respect to a Systemwide Debt Security issued on behalf of a defaulting bank, the FCA is required to appoint FCSIC as the receiver for the defaulting bank. The receiver would be required to expeditiously liquidate assets of the bank.

AgFirst did not anticipate making any payments on behalf of its co-obligors under the Joint and Several Liability Allocation Agreement for any of the periods presented. The total amount outstanding and the carrying amount of the Bank's liability under the agreement are as follows:

(dollars in billions)	6/30/17	12/31/16
Total System bonds and notes	\$ 258.391	\$ 257.782
AgFirst bonds and notes	\$ 28.927	\$ 29.408

From time to time, legal actions are pending against the Bank in which claims for money damages are asserted. On at least a quarterly basis, the Bank assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. While the outcome of legal proceedings is inherently uncertain, on the basis of information presently available, management and legal counsel are of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the Bank. Because it is not probable that the Bank will incur a loss or the loss is not estimable, no liability has been recorded for any claims that may be pending.

## Note 9 — Additional Financial Information

## Offsetting of Financial and Derivative Assets

	June 30, 2017												
					Offset in ets								
(dollars in thousands)		Gross mounts of ecognized Assets	Offse	Amounts et in the ce Sheets	As	et Amounts of esets Presented in the Balance Sheets	_	inancial struments	Col	Cash llateral eceived		let ount

There were no liabilities subject to master netting arrangements or similar agreements during the reporting periods.

A description of the rights of setoff associated with recognized derivative assets and liabilities subject to enforceable master netting arrangements is located in Note 10, *Derivative Financial Instruments and Hedging Activities*.

The reverse repurchase agreements are accounted for as collateralized lending.

### Combined ACA Only Financial Data (Unaudited)

Condensed financial information for the combined District Associations follows. All significant transactions and balances between the Associations are eliminated in combination.

Combined financial statements of the District Associations and the Bank are included in the AgFirst Farm Credit Bank and District Associations' Second Quarter 2017 Report and 2016 Annual Report. Eliminations for all significant transactions and balances between the Bank and the District Associations are reflected in the combined financial statements included in that report. In addition, the multiemployer structure of certain of the District's retirement and benefit plans results in the recording of these plans only in the District's combined financial statements.

### Note 10 — Derivative Financial Instruments and Hedging Activities

One of the Bank's goals is to minimize interest rate sensitivity by managing the repricing characteristics of assets and liabilities so that the net interest margin is not adversely affected by movements in interest rates. The Bank maintains an overall interest rate risk management strategy that may incorporate the use of derivative instruments to achieve that goal. Currently, the primary derivative type used by the Bank is interest rate swaps, which convert fixed interest rate debt to a lower floating interest rate than was achievable from issuing floating rate debt with identical repricing characteristics. They may allow the Bank to lower funding costs, diversify sources of funding, or alter interest rate exposures arising from mismatches between assets and liabilities. Under these arrangements, the Bank agrees with other parties to exchange, at specified intervals, payment streams calculated on a specified notional principal amount, with at least one stream based on a specified floating rate index.

The Bank may also purchase interest rate derivatives, such as caps, in order to reduce the impact of rising interest rates on its floating-rate debt, and floors, in order to reduce the impact of falling interest rates on its floating-rate assets. In addition, the Bank may also fix a price to be paid in the future which qualifies as a derivative forward contract.

As a result of interest rate fluctuations, interest income and interest expense related to hedged variable-rate assets and liabilities, respectively, will increase or decrease. Another result of interest rate fluctuations is that hedged fixed-rate assets and liabilities will appreciate or depreciate in market value. The effects of any earnings variability or unrealized changes in market value are expected to be substantially offset by the Bank's gains or losses on the derivative instruments that are linked to these hedged assets and liabilities. The Bank considers its strategic use of derivatives to be a prudent method of managing interest rate sensitivity, as it prevents earnings from being exposed to undue risk posed by changes in interest rates.

The primary types of derivative instruments used and the amount of activity for the periods presented is summarized in the following table:

	For the Six Months Ended June 30,										
		201	7		2016						
Notional Amounts (dollars in millions)	Receive- Fixed Swaps		Forward Contracts		Receive- Fixed Swaps		Forward Contracts				
Balance at beginning of period	\$	50	\$	1	\$	150	\$	_			
Additions		_		5		_		1			
Maturities/amortization		(50)		(5)		_		_			
Terminations		_		-		-		_			
Balance at end of period	\$	_	\$	1	\$	150	\$	1			

By using derivative instruments, the Bank exposes itself to credit and market risk. If a counterparty fails to fulfill its performance obligations under a derivative contract, the Bank's credit risk will equal the fair value gain in the derivative. Generally, when the fair value of a derivative contract is positive, this indicates that the counterparty owes the Bank, thus creating a repayment risk for the Bank. When the fair value of the derivative contract is negative, the Bank owes the counterparty and, therefore, assumes no repayment risk.

To minimize the risk of credit losses, the Bank transacts with counterparties that have an investment grade credit rating from a major rating agency and also monitors the credit standing of, and levels of exposure to, individual counterparties. The Bank typically enters into master agreements that contain netting provisions. These provisions allow the Bank to require the net settlement of covered contracts with the same counterparty in the event of default by the counterparty on one or more contracts.

Counterparty exposure related to derivatives at:

(dollars in millions)	June 30, 2017	December 31, 2016			
Estimated Gross Credit Risk	\$-	\$0.1			
Percent of Notional	-%	0.18%			

There was no cash or securities collateral held or posted for the periods presented.

The Bank's derivative activities are monitored by its Asset-Liability Management Committee (ALCO) as part of the Committee's oversight of the Bank's asset/liability and treasury functions. The ALCO is responsible for approving hedging strategies that are developed within parameters established by the Bank's Board of Directors through the analysis of data derived from financial simulation models and other internal and industry sources. The resulting hedging strategies are then incorporated into the Bank's overall interest rate risk-management strategies.

### Fair Value Hedges

For derivative instruments designated as fair value hedges, the gains or losses on the derivative, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, are recognized in current earnings. The Bank includes the gain or loss on the hedged items in the same line item (interest expense) as the offsetting loss or gain on the related interest rate swaps. During the six months ended June 30, 2017, there were no interest rate swaps outstanding. The amount of the loss on interest rate swaps recognized in interest expense for the six months ended June 30, 2016 was \$3.2 million, while the amount of the gain on the Systemwide Debt Securities was \$3.2 million. Gains and losses on each derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

### Cash Flow Hedges

From time to time, the Bank may acquire when-issued securities, generally government agency guaranteed bonds. The when-issued transactions are contracts to purchase securities that will not be delivered until 30 or more days in the future. These purchase commitments are considered derivatives (cash flow hedges) in the form of forward contracts. Any differences in market value of the contracted securities, between the purchase and reporting or settlement date, represent the value of the forward contracts. These amounts are included in OCI, and Other Liabilities or Other Assets as appropriate, as firm commitments in the Bank's Balance Sheet for each period end. As of the periods presented, the Bank had not committed to purchase any when-issued bonds.

For derivative instruments that are designated and qualify as a cash flow hedge, such as the Bank's forward contracts, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

## Fair Values of Derivative Instruments

The following tables represent the fair value of derivative instruments designated as hedging instruments for the periods presented:

(dollars in thousands)	Balance Sheet Classification – Assets	6/30 Fair V		Balance Sheet Classification – Liabilities	6/30 Fair V	
Receive-fixed swaps	Other Assets	\$	-	Other Liabilities	\$	-
Forward contracts	Other Assets		_	Other Liabilities		_
Total		\$	_		\$	_
	Balance Sheet	10/0		Balance Sheet		
(dollars in thousands)	Classification – Assets	12/3 Fair V	Value	Classification – Liabilities	12/31 Fair V	
(dollars in thousands)  Receive-fixed swaps				0		
	Assets	Fair V	Value	Liabilities	Fair V	

The following table sets forth the amount of net gain (loss) on derivatives recognized in earnings and, for cash flow hedges, the amount of net gain (loss) recognized in AOCI for the periods presented. See Note 5, *Shareholders' Equity*.

(dollars in thousands)	Location of Gain or (Loss) Recognized in, or Reclassified from AOCI into, Income	Amount of Gain or (Loss) Recognized in, or Reclassified from AOCI					Amount of Gain or (Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)				Amount of Gain or (Loss) Recognized in OCI on Derivative (Effective Portion)			
			2017	- 2	2016	2	017	20	016		2017	20	)16	
Fair Value Hedges: Receive-fixed swaps	Noninterest income	\$	_	\$	_									
Cash Flow Hedges: Firm Commitments	Interest Income	\$	(273)	\$	(63)	\$	-	\$	_	\$	_	\$	_	
Forward Contracts	Gains (Losses) on Other Transactions		(46)		5		_		_		(46)		5	

<sup>\*</sup> Represents total gain or loss for fair value hedges and effective portion for cash flow hedges.

# Note 11 — Subsequent Events

The Bank evaluated subsequent events and determined there were none requiring disclosure through August 8, 2017, which was the date the financial statements were issued.
